

## FOR ALL TYPES OF VEHICLES.

Extendable units fit passenger cars, pick-ups and vans. The units can be placed on the floor (left photo) to retain floor space, between other racking units (right photo) for maximum cargo space and next to the side door (centre photo) for fast and easy access.

Extendable units are part of Modul-System's product range. Modul-System was founded in Sweden in 1970 and is today one of Europe's leading companies in racking systems for light commercial vehicles.

For more information on how to

equip your vehicle with extendable units, please visit our website. There you can find contact details for our sales representatives who will be happy to arrange an entirely no-obligation meeting to discuss your requirements.

MORE LOAD.  
LESS WORK.

**DON'T PUT OUT YOUR BACK.**

**PULL OUT A DRAWER INSTEAD.**

# LARGE, SMALL, LONG, SHORT, HEAVY, LIGHT. WHATEVER.

Extendable units have room for just about everything you need to take with you. From tools and measuring instruments to binders and paper. Up to 70 kilos per drawer.

With extendable units your load is easily accessible. Instead of searching

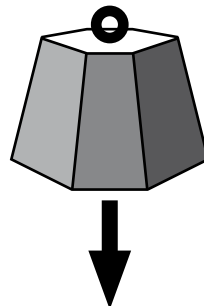

around and lifting up things, just pull out a drawer. You save your back, your time and give a professional impression.

And you improve safety. No risk of loose objects flying around when you slam on the brakes or go round a sharp corner. Everything stays in place, in a drawer.

Our extendable units are made of aluminium. This saves weight and gives an attractive appearance. The aluminium surfaces are anodised to protect against stains and scratches. Fluted rubber mats in the bottom of drawers further prevent things from moving around.

Takes 70 kilos.

**Easy to pull out.**

Gliding on ball bearings, the drawer opens easily and smoothly all the way.

**Dimensions.**  
The table refers to standard dimensions we have in stock. Combine as you wish, for example 355 x 108 x 784 or 535 x 216 x 1568 millimetres. Other width and depth specifications are available as special orders.

Width (mm)	355
	535
Height (mm)	108
	216
Depth (mm)	784
	980
	1176
	1372
	1568
